# Kaymbu

The Kaymbu application helps us bring the classrooms to life. "Kaymbu is the leading visual messaging and documentation system for educators. Using Kaymbu, teachers can easily share the essence of their classroom - from unforgettable "Aha!" moments to reflective learning journeys." During your child's time at Glendale Heights, the teachers will take pictures to share with you during the day so that you feel more connected to your child while you are away working. We will also use Kaymbu as a tool to create electronic observations. We utilize observations to track a child's individual progress using Creative Curriculum. Kaymbu will also be utilized to send daily messages regarding activities done throughout the day or reminders about upcoming events/activities.

School Closed This Evening and Tomorrow!

We just received notification that Cambridge Public Schools will be closing at 4:00pm today. We follow their school closings and will also be closing early this evening.

We realize you need time to get to school safely to pick up your child. Please plan to pick up your child this evening no later than 5:30pm, as we will be closing at that time.
